

## **Sub-part 6101 – Public Transit**

### **Chapter 53004 Transportation Coordination**

#### Purpose

- 100 Provide guidance on Coordination of Transportation Resources
- 101 Describes MDOT's policy and approach to promoting coordination of transportation programs and resources with and among applicants, contractors, state agencies and other stakeholders.
- 102 Coordination of transportation services is an integral part of the Mississippi Department of Transportation's policies and goals for administration of the transportation programs and projects that are funded with federal, state, or local funds. The MDOT will make every reasonable effort to implement coordination between state, regional and local agencies involved in funding and providing transportation services. In order to accomplish this, MDOT supports the activities of and will utilize resources of various internal and external entities referenced in Chapter III Part A.-D of the approved State Management Plan for Federal Transit Administration Funded Transportation Programs . (The State Management plan is available through the Public Transit Division) In addition, the MDOT will focus on coordination of resources as a part of the application for and monitoring of all FTA funded projects planned and authorized through programs administered by the Public Transit Division.
- 103 Applicants for and subrecipients of federal and state funds are required to submit evidence of coordination during the application, monitoring and project evaluation stages. Failure to coordinate or show good faith efforts to coordinate services and/or resources could result in denial or suspension of funding.
