

**IMPROVEMENTS TO INTERSTATE 55
Lincoln and Pike Counties, Mississippi**

**Project Numbers:
DB/IM-0055-02(226)/105444-303
DB/IM-0055-02(226)/105444-304**

Answers to questions received as of 6/5/13:

- 1. We have an Alternate Technical Concept (ATC) that meets FHWA Accelerated Bridge Construction guidelines and is not listed in the Technical Requirements of the RFP that we would like to propose. How should this be addressed?**

Answer: Proposers shall comply with all technical requirements in the RFP. Any questions about these technical requirements may be submitted in accordance with the process for submitting formal questions. If, based on MDOT's response to a question, any changes are warranted to the technical requirements, MDOT will consider issuing an appropriate addendum.

- 2. Item #6 of Technical Requirement 17.3 states that SR24/US98 may be reduced to a two lane/two-way head-to-head configuration for a maximum of 6 weeks. Please confirm that this is 6 weeks per phase.**

Answer: The time frame listed in the RFP is the total cumulative allowable length of time traffic may be reduced to a two-lane/two-way configuration for all phases utilized by the contractor.
