ENVIRONMENTAL PROFESSIONAL STATEMENT AND SIGNATURE

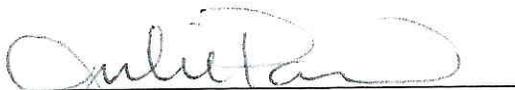

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Qualifications of the undersigned environmental professional are presented in Table 1.

EXECUTIVE SUMMARY

Neel-Schaffer, Inc., Ridgeland, Mississippi, has performed a Survey of Potential Hazardous Materials Sites for the Mississippi Department of Transportation (MDOT) proposed Vicksburg Interstate 20 (I-20) Improvement Project located in Vicksburg, Warren County, Mississippi.

At the time of the site reconnaissance, the project area was defined as an approximate six-mile corridor located along I-20 beginning at the I-20/Highway 61 Interchange and terminating near the Mississippi River Bridge. Improvements will be made to the interchanges at Washington Street, Highway 61 South, Halls Ferry Road, Indiana Avenue and Highway 80/Clay Street. The project area includes mostly residential and commercial properties and wooded areas. Generators and common underground utilities such as natural gas lines, water and sewage lines, and other utility lines are located throughout the entire project area. Sites affecting Alternatives B and C were reviewed (refer to Figure 1).

This survey revealed several sites listed in the Environmental Data Resources (EDR) report that have potential to cause contamination to portions of Alternatives B and C. Several sites found through site reconnaissance that are not documented in the EDR report also have potential to cause contamination to portions of Alternatives B and C. These sites have potential to handle and store hazardous materials and/or waste and are listed in Sections 3 and 4 of the herein report.

Based on the results of this survey, NSI recommends that further investigation is warranted for several sites within the project area. The following sites located within or adjacent to the proposed right-of-way of Alternatives B and C contain or have potential to contain hazardous materials and/or waste onsite and are considered moderate to high risk with respect to environmental concerns to the proposed project area.

EDR MLTS site

- *United States Army Corps of Engineers*

EDR UST sites

- *Pantry #3739 DBA Kangaroo*
- *Pantry #3444 DBA Fast Lane*

EDR UST and LUST sites

- *Pantry #3445 DBA Fast Lane*
- *Pantry #3750 DBA Kangaroo*
- *Pantry #3753 DBA Kangaroo*
- *Mac's Fina Station #536*

- *Pump & Save #2634 (also Sac & Save #49)*
- *Interstate Station #28*
- *Pantry #3443 DBA Fast Lane*
- *Battlefield Truck Plaza*
- *Pantry #3447 DBA Fast Lane*

EDR SHWS Site

- *Hall's Ferry Park and Dump*

EDR FINDS sites

- *Plaza Auto Service and Tire Center*

RCRA CESQG

- *Kroger/Former K-Mart*

RCRA SQG

- *Vicksburg Ford Lincoln Mercury*

EDR FINDS, FTTS, HIST FTTS, UST, and LUST site

- *Vicksburg Medical Center/River Region West Campus*

Potential Hazardous Materials Sites found through Site Reconnaissance

- *Hillcrest Motel (former service station)*
- *Vacant lot (carnival equipment storage area)*
- *Highway 61 North Superlube and Extreme ATV's*
- *United Cleaners/Corner Market Shopping Center*
- *Kolb Grand Cleaners*
- *Vicksburg Cycles*

1.0 INTRODUCTION

1.1 Purpose

The Mississippi Department of Transportation retained Neel-Schaffer, Inc. (NSI) to conduct a survey of potential hazardous materials sites along the Interstate 20 (I-20) corridor located in Vicksburg, Warren County, Mississippi.

1.2 Scope of Services

The scope of this survey included the following activities which have been modified from the full ASTM scope due to the size of the study area and excessive number of landowners involved:

1. Reporting of results of an inquiry by an environmental professional.
2. Interviews with past and present owners, operators, and/or occupants of proposed project area as deemed necessary, for the purpose of gathering information regarding the potential for contamination at the facility.
3. Review of historical sources, such as aerial photographs, topographic maps, and/or land use records, to determine previous uses and occupancies of the proposed project area.
4. Review of federal, state and local government records, waste disposal records, underground storage tank records, and hazardous waste handling, generation, treatment, disposal and spill records concerning contamination at or near the project area as provided by a commercial database service.
5. Visual inspections of the proposed project area and adjoining properties from a driving (windshield) reconnaissance or survey along public roads.

1.3 Limitations

The following report documents the analysis, opinions, and results and conclusions obtained during development of the hazardous materials survey. This survey is based on information collected by NSI and is correct and current as of the date of the research and site visits conducted in the spring of 2010. When a survey is completed with limited or no subsurface exploration or chemical screening of soil and groundwater at or beneath the site, no statement of scientific certainty can be made regarding latent environmental conditions that may be the result of on-site or off-site sources. The findings and conclusions of this report are not scientific certainties, but rather, probabilities based on professional judgment concerning the significance of the data gathered during the course of the environmental survey.

NSI does not represent that the site or adjoining land contains no hazardous materials, oil, or other latent conditions beyond that detected or observed during the survey. The possibility always exists for contaminants to migrate through surface water, air, or groundwater. The ability to address the environmental risk associated with transport in these media is beyond the scope of this investigation. Further, information regarding state and federal environmental records was provided by Environmental Data Resources (EDR) over two years prior to the date of this report.

2.0 SITE DESCRIPTION

2.1 Location

The project area is an approximate six-mile long proposed corridor extending from the I-20/Highway 61 North interchange and terminating at the Mississippi River Bridge in Vicksburg, Warren County, Mississippi, as shown on the Aerial Photograph (Figure 1). Maps depicting the project area and features are provided as Figures 1 through 7 (Aerial Photographs and Topographic Maps). Improvements will be made to the interchanges at Highway 80/Clay Street, Indiana Avenue, Halls Ferry Road, Highway 61 South, and Washington Street.

2.2 Current Uses of the Project Area and Adjoining Properties

The project is situated in an urban area and development is predominantly commercial and light industrial with a few residences. The proposed routes for Alternatives B and C overlap for most of the project area and are shown in Figure 1. Sites identified as currently or previously having hazardous materials were typically service stations, convenience stores, automobile dealerships, and automobile service facilities. Other facilities of interest included a hospital, hotels, a casino, home and garden centers, and dry cleaners.

3.0 RECORDS REVIEW

3.1 Environmental Database and Records Search

Information from standard federal and state environmental record sources was provided by EDR. The results of the EDR search are included as Appendix A. Table 2 lists each database searched, the date of the most recent update, and the search distance from the project area boundary.

**Table 2.
Summary of Database Information Obtained During Survey Preparation**

Federal Databases	Date of Database*	Search Distance
National Priorities List (NPL)	7/28/08	1.0 mile
Proposed NPL	8/27/08	1.0 mile
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	9/19/09	0.5 mile
Comprehensive Environmental Response, Compensation, and Liability Information System/No Further Remedial Action Planned (CERCLIS-NFRAP)	9/15/08	0.5 mile
Resource Conservation and Recovery Information System – Corrective Action Sites (CORRACTS)	9/02/08	1.0 mile
Resource Conservation and Recovery Information System – Treatment, Storage, and Disposal Facilities (RCRA-TSD)	9/23/08	0.5 mile
Resource Conservation and Recovery Act – Small or Large Quantity Generators (SQG or LQG)	9/23/08	0.25 mile
Emergency Response Notification System (ERNS)	7/25/08	Target Property
State Databases for Mississippi and Louisiana	Date of Database	Search Distance
Mississippi State Hazardous Waste Sites (SHWS)	7/22/08	1.0 mile
Louisiana SHWS	8/11/08	1.0 mile
Mississippi State Solid Waste Landfills (SWF/LF)	9/18/08	0.5 mile
Louisiana SWF/LF	7/9/08	0.5 mile
Mississippi Leaking Underground Storage Tanks (LUST)	7/24/08	0.5 mile
Louisiana LUST	8/11/08	0.5 mile
Mississippi Underground Storage Tanks (UST)	7/24/08	0.25 mile
Louisiana UST	8/11/08	0.25 mile

***Corresponds to Date of Last EDR Contact in Appendix A.**

Source: EDR 2008.

Note: Information provided by EDR is presented in English units, in accordance with ASTM E 1527-05 standards.

3.2 Federal Database Search Results

3.2.1 Federal National Priorities List

The Federal National Priorities List (NPL) is the USEPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial action under the Superfund program. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980. No NPL sites or proposed NPL sites were located within a 1.0-mile search distance of the project area.

3.2.2 Federal CERCLIS List

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation by the USEPA of the sites that the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances. No CERCLIS sites are located within a 0.5-mile search distance of the project area.

The No Further Remedial Action Planned Report (NFRAP), also known as the CERCLIS Archive, contains information pertaining to sites, which have been removed from the USEPA's CERCLIS database. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require federal superfund action or NPL consideration. No CERCLIS – NFRAP sites are located within a 0.5-mile search distance of Alternatives B and C.

3.2.3 Federal Resource Conservation and Recovery Act

The USEPA's Resource Conservation Recovery Act (RCRA) program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA facilities database is a compilation by the USEPA of facilities that generate, transport, treat, store, or dispose of hazardous waste. The following are the results of the database searches under the RCRA program.

The Corrective Action Sites (CORRACTS) database contains information concerning RCRA facilities that have conducted or are currently conducting a corrective action. No RCRA – CORRACTS are located within a 1.0-mile search distance of the project area.

One RCRA – Treatment, Storage, and/or Disposal site (RCRA – TSDs) is located within a 0.5-mile search distance of Alternatives B and C.

Large quantity generators are facilities that generate at least 1,000 kilograms per month of non-acutely hazardous waste. One RCRA - Large Quantity Generator (RCRA – LQG) site is located within a 0.25-mile search distance of the project area.

- USACE Vicksburg District Supply – This facility is located at 2101 North Frontage Road, adjacent to and south of the project area. No violations have been reported for this facility, and this facility should pose a low risk with respect to environmental concern to the proposed project area.

Small quantity generators are facilities that generate less than 1,000 kilograms per month of non-acutely hazardous waste. No RCRA - Small Quantity Generators (RCRA – SQG) were located within a 0.25-mile search distance of Alternatives B and C. Six RCRA - Conditionally Exempt Small Quantity Generator (RCRA - CESQG) sites are located within a 0.25-mile search distance of Alternatives B and C.

- Atwood Chevrolet-Oldsmobile
- Vicksburg Ford Lincoln Mercury
- One Hour Cleaners
- Saxton's Garage
- Wal-Mart Supercenter #708
- Quality Lube of Vicksburg Inc.

These facilities are located along the I-20 corridor and have had no violations reported. These facilities are considered a low risk with respect to environmental concern to the project area except for the Vicksburg Ford Lincoln Mercury facility located at 2431 North Frontage Road, situated partially within the right-of-way for Alternatives B and C and is considered a moderate risk with respect to environmental concern for these alternatives.

3.2.4 Federal Emergency Response Notification System

The Federal Emergency Response Notification System (ERNS) is a national database maintained by the USEPA and the National Response Center of the U.S. Coast Guard. It is used to collect information on reported accidental releases of oil and hazardous substances. No ERNS sites were reported within the project area.

3.3 State Database Search Results

3.3.1 State Hazardous Waste Sites

The State Hazardous Waste Sites (SHWS) list is the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. The Mississippi Department of Environmental Quality (MDEQ), Office of Pollution Control (OPC), maintains this database. The four following SHWS sites are located within a 1.0-mile search distance of the project area:

- Ameristar Casino;
- Halls Ferry Park (Halls Ferry Road Dump);
- Vicksburg Terminal Co. Inc.; and
- GSPC-(00774).

Due to the distance from or their location down-gradient from the proposed project ROW, these facilities are considered a low risk with respect to environmental concern from the proposed project area except for the Hall's Ferry Park (Hall's Ferry Road Dump) facility. Due to the location of this facility, 1,300-feet south of the proposed project area, this facility is considered a moderate risk with respect to environmental concern to the proposed project area.

3.3.2 State Solid Waste Landfills

The MDEQ, OPC maintains this database. This database includes solid waste landfills, solid waste transfer stations, solid waste incinerators, recycling directories, permitted landfills and municipal solid waste landfills. No solid waste landfills are located within a 0.5-mile distance of project area.

3.3.3 State Leaking Underground Storage Tanks

This is a database of leaking underground storage tanks (LUST) with confirmed releases. This database is provided by the MDEQ, UST Section. Twelve LUST facilities are located within a 0.5-mile distance of the project area (see Table 3). These LUST sites are also underground storage tank (UST) sites. Five of these LUST sites appear to be located within the ROW of the proposed Alternatives B and C and are shown below:

- Pantry #3445 DBA Fast Lane;
- Pantry #3750 DBA Kangaroo;
- Pantry #3753 DBA Kangaroo;
- Mac's Fina Station #536
- River Region West Campus;
- Pump and Save #2634;
- Interstate Station #28;
- Pantry # 3443 DBA Fast Lane,
- Battlefield Truck Stop; and

- Pantry #3447.

Due to their “no further action” (NFA) statuses or “closed” LUST status, the following facilities, except for those facilities listed above, present a low risk with respect to environmental concern to the project area.

Table 3. MDEQ LUST Registration List

Location	No. of Tanks	Tanks Installed	Tank Status	Volume (gallons)	Confirmed Release	NFA Date	Contents
Pantry #3445 DBA Fast Lane/Kangaroo 574 Hwy 61 North Facility ID 3602	4	1985	Active	12,000	Yes	Not reported, LUST status closed	Gasoline

3.3.4 State Underground Storage Tanks

This is a database of registered underground storage tanks (UST). This database is provided by the MDEQ, UST Section. Sixteen UST facilities are located within a 0.25-mile distance of the project area based on the EDR Report, and the five UST facilities listed below appear to be located within the proposed project ROW for Alternatives B and C.

- Pantry #3739 DBA Kangaroo;
- Vicksburg Printing and Publishing; and
- Pantry #3444 DBA Fast Lane.

Since no leakages have been reported for the following UST facilities, except for those facilities listed above, these facilities are considered a low risk with respect to environmental concern to project area.

Table 4. MDEQ UST Registration List

Location	No. of Tanks	Tanks Installed	Tank Status	Volume (gallons)	Contents

3.4 Unmappable Sites

As described in the EDR report, unmappable sites are environmental regulated sites that cannot be mapped, but can be located through the database searches by zip code or city name. In general, a site cannot be mapped because of inaccurate or missing location information provided to the agency. All unmappable sites that have a zip code in the search distance were listed in the EDR report. A total of 125 unmappable sites are identified, and two sites were found to be located within or adjacent to the project area. A complete list of unmappable sites is included in Appendix A. The following two sites were unmappable sites located adjacent to the

proposed project area; however, these sites are considered a low risk with respect to environmental concern to the proposed project area:

- Wal-Mart Store #0708; and
- Rivertown Lincoln-Mercury Jeep (refer to Rivertown Toyota in Section 3.3.3).

3.5 Historical Use Information

3.5.1 Proposed Project Area Historical Use Information

The following historical sources were reviewed and are attached as Figures 1 through 7:

- 2009 Aerial Photograph provided by the Mississippi Automated Resource Information System (M.A.R.I.S.);
- 1973 *Jackson, Mississippi, Louisiana* 1:250,000 – Scale Series United States Geological Survey (USGS);
- 1984 *Jackson, Mississippi, Louisiana* 1:100,000 – Scale Series United States Geological Survey (USGS);
- 1962 *Vicksburg East, Mississippi* 7.5 Minute Series United States Geological Survey (USGS);
- 2003 *Vicksburg West, Mississippi, Louisiana* 7.5 Minute Series United States Geological Survey (USGS); and
- Sanborn Maps (no coverage).

Previous development of the project area and adjacent properties included commercial businesses and residences located along Highway 61 North, Highway 61 South, Highway 80, I-20 and corresponding frontage roads, Clay Street, Indiana Avenue, Halls Ferry Road, South Washington Street/Warrenton Road, and streets located within the vicinity of the I-20 corridor.

4.0 SITE RECONNAISSANCE

4.1 Methodology and Limiting Conditions

A site reconnaissance was performed by Ms. Julie Parrish and Mr. Greg Taylor of NSI, on April 13, 2010. Photographs taken of the project area and adjoining properties are attached as Appendix C. The site reconnaissance was accomplished by driving on the nearby interstate, frontage roads, streets, and highways and performing a windshield survey.

4.2 General Site Setting

The project area is defined as an approximate six-mile long corridor along I-20 beginning at the Highway 61/I-20 interchange, extending west/southwest through Vicksburg, and terminating near the I-20 Mississippi River Bridge. The proposed project area land use consists of residences, commercial and light industrial properties, wooded areas, and undeveloped land.

Adjoining property usage noted during the site reconnaissance was as follows:

- North – residences, commercial properties and undeveloped land;
- South – residences, commercial properties, industrial properties and undeveloped land;
- East – residences, commercial properties and undeveloped land; and
- West – residences, commercial properties and undeveloped land.

4.3 Sites Identified Through Field Reconnaissance

Nineteen sites with potential to contaminate the project area were identified through the site reconnaissance and were not listed in regulatory databases. Automotive repair shops and other sites located adjacent to the proposed ROW could pose an environmental concern to the project area and should be re-evaluated for environmental contamination if the project area boundaries are redefined after finalization of this report. A summary of all sites potentially having hazardous materials is located in Table 5. The following sites are located within or adjacent to the proposed project area and are considered a moderate to high risk with respect to environmental concern to the project:

- Hillcrest Motel (former service station);
- Vacant Lot (carnival equipment storage area);
- Highway 61 North Superlube and Extreme ATV's;
- United Cleaners/Corner Market Shopping Center;
- Kolb Grand Cleaners; and
- Vicksburg Cycles.

TABLE 5: SUMMARY OF SITES POTENTIALLY HAVING HAZARDOUS MATERIALS

Facility Name and Address	Database(s)	Location Relative to Proposed ROW	Environmental Risk	Contact Information	Comment
Highway 61 Stop, 887 Highway 61 North	UST	Nearby but not adjacent to project	low	Unknown	No reported release
Pantry #3445 DBA Fast Lane, 574 Highway 61 North (at Riley Road)	UST, LUST	Within ROW for Alt. B and C. Requires relocate for Alt. B and C	high	Petroleum Realty VI LLC, 801 Arthur Godfrey Road, Suite 600, Miami Beach, FL 33140	Four USTs currently in use
Jackson Ready Mix Concrete, 1582 Highway 80 East	FINDS, PERMITS	Physical address not near project	low	Unknown	No comment
Pantry #3750 DBA Kangaroo, 3326 Clay Street (at Old SR 27)	UST, LUST	Adjacent to ROW for Alt. B and C	moderate	Vicksburg LP Gas Company, Inc.	Four Active USTs, NFA date: 3/23/01
Pantry #3753, 4460 Clay Street (at SR 27)	UST, LUST	Adjacent to ROW for Alt. B and C	moderate	Vicksburg LP Gas Co., P.O. Box 66, Vicksburg, MS 39180 and Waring Oil Co., 431 Port Terminal Circle, Vicksburg, MS 39183-9070	Three active USTs, NFA date: 6/13/94, Not Trust Fund Eligible
Mac's Fina Station #536 (NW corner Highway 80 & SR 27)	UST, LUST	Within ROW for Alt. B and C. Minimal new ROW needed for both Alts.	moderate	Unknown	NFA date: 7/13/98
Warren County, 610 Highway 80	FINDS	Physical address not near project	low	Unknown	No comment

*Facility did not appear in database report

5.0 INTERVIEWS

The interviews were conducted by Ms. Julie Parrish. Summaries of the interviews are presented in the following sections.

5.1 Interviews with Past and Present Owners/Managers

NSI interviewed land owners, relatives of landowners, or facility managers at facilities having unknown regulatory status but posing potential environmental concern, as deemed necessary.

NSI interviewed Mr. Clyde Stinson (601-636-5252), representative of Highway 61 North Superlube located at 600 Highway 61 North, Vicksburg, Mississippi, by telephone on October 29, 2010. Mr. Stinson stated that five USTs are located at this facility and that the USTs are located in the interior of the building and exterior of the building to the east (rear). Mr. Stinson was not aware of any leakages associated with the USTs at this facility or of any environmental concerns with this facility.

NSI interviewed Mr. Jay Jabour (601-619-1551), manager of the Hillcrest Inn/Motel located at 40 Highway 80 East, Vicksburg, Mississippi, by telephone on November 12, 2010. Mr. Jabour stated that USTs were previously located at this facility and were removed approximately 10 to 15 years ago. According to Mr. Jabour, carnival rides/equipment is periodically stored on the open lot behind this motel. Mr. Jabour knew of no environmental concerns with the Hillcrest Inn/Motel property or with the vacant lot behind the motel property.

NSI interviewed Ms. Norma Habeeb (601-636-4302), relative of the former Saxton's service station landowner, by telephone on November 12, 2010. This facility was located on the I-20 South Frontage Road, adjacent to and west of Saxton's Tire Barn Automotive. Ms. Habeeb stated that a former service station previously located on this property was razed and the tanks were removed from this facility approximately 10 years ago. Ms. Habeeb was unaware of any environmental issues with this property.

NSI interviewed Ms. Nancy Watkins (601-636-3852), facility manager of Watkins Nursery Home and Garden Center located at 3698 South Frontage Road, Vicksburg, Mississippi, by telephone on November 12, 2010. Ms. Watkins stated that insecticides are sold in small containers at this facility and that no other chemicals are stored or used at this facility. Ms. Watkins was unaware of any environmental concerns with this property.

NSI interviewed Mr. James "Brother" Blackburn (601-636-2766), owner of Blackburn Motor Company, by telephone on November 12, 2010. Mr. Blackburn stated that five ASTs are located at this facility; however, he stated that the ASTs containing waste oil, gasoline, and diesel are located at the automotive repair shop, at least 200 feet from the I-20 Frontage Road. Mr. Blackburn stated that the waste oil ASTs are periodically pumped out and the waste oil is taken off-site by a waste oil hauler, and he was unaware of any leakages associated with the Blackburn property. Mr. Blackburn was also unaware of whether or not USTs were previously located at the Vicksburg Cycles property, located adjacent to and west of the Blackburn facility.

NSI interviewed Mr. Mike Holloway (601-883-2453), facility manager of Vicksburg Cycles, by telephone on May 13, 2010. Mr. Holloway stated that small amounts of hazardous materials are handled at this facility, and he was unaware of any USTs located at this facility or previously located at this facility in association with the vent pipes attached to the exterior wall of the building. He was unaware of any environmental concerns with this facility.

NSI interviewed Mr. Doile Lee (601-636-3645), owner of Plaza Auto Service and Tire Center located at 1850 South Frontage Road, by telephone on November 12, 2010. Mr. Lee stated that one approximate 500-gallon AST and several 55-gallon drums are located at this facility. Mr. Lee stated that he is unaware of any leakages from these tanks or drums and that the waste oil contained at this facility is periodically pumped out and taken off-site by a waste oil hauler. Mr. Lee was unaware of any environmental concerns with this property. According to Mr. Lee, the property located adjacent to and east of the automotive facility, in the location of the Barnes Auto Glass and Windshield Repair, was previously a truck stop in which a fuel release occurred approximately 15 years ago. Mr. Lee could not recall the name of this facility. He stated that the facility was razed approximately 10 to 15 years ago and soil was excavated from the facility under the direction of state and government agencies.

NSI interviewed Mr. Jeff Nelson (601-415-1236), T & S Tunnel Express manager located at 3530 Pemberton Square Boulevard, by telephone on November 12, 2010. This facility is located adjacent to the proposed project ROW. Mr. Nelson stated that hazardous materials are not handled or stored at this facility and that he was unaware of any environmental concerns with this property.

NSI interviewed Mr. Randy Thorne (601-636-8604), with Thorne Collision Center located at 4075 Pemberton Square Boulevard, by telephone on October 29, 2010. Mr. Thorne stated that small quantities of hazardous waste are generated at this facility and contained inside of three 55-gallon drums. The drums containing hazardous waste are picked up and taken off-site for disposal by a hazardous waste hauler every six months. Mr. Thorne was not aware of any environmental concerns with this property.

NSI interviewed Mr. Joseph Curro (601-961-5655) with the MDEQ, UST Section by telephone on September 14, 2010. Mr. Curro stated that a "no further action" status was issued for the Interstate Station #28 LUST facility, located at 1435 North Frontage Road, on December 19, 2007. He also stated that information regarding the USTs located at the Vicksburg Cycles facility, 1979 North Frontage Road, Vicksburg, Mississippi, was unavailable. Mr. Curro could not recall whether or not USTs were previously in place at the Vicksburg Cycles facility when it was owned by Sears.

NSI interviewed Mr. Tommy Newell (601-638-2546), business manager for Local Union 619 of the United Association of Journeymen and Apprentices of the Plumbing and Pipe by telephone on February 3, 2011, regarding the property located at 3203 North Frontage Road. Mr. Newell stated that his company filled in the swimming pool during the summer of 2010 after purchasing the property containing the pool from Beard Real Estate.

NSI contacted Mr. Willie McKercher with the Mississippi Department of Environmental Quality (MDEQ) on February 3, 2011, regarding the Hall's Ferry Park and Dump property located on Halls Ferry Road, south of Interstate 20. Mr. McKercher stated that the property, owned by the City of Vicksburg, was a landfill that has been capped and converted to a ball park. Mr. McKercher stated that no known soil or groundwater contamination is associated with the landfill; however, a subsurface investigation has not been conducted to determine potential contaminants resulting from dumping at this location.

5.2 Interviews with Local Government Officials

NSI contacted Ms. Nicole Vera, Deputy Director of 911 services in Vicksburg, Mississippi (601-631-8800), by telephone on April 23, 2010. Ms. Vera stated that minor fuel spills and accidents have occurred on I-20 within the proposed project area. Ms. Vera stated that any chemical spills or hazardous materials emergencies that have occurred along the I-20 corridor have been

cleaned up. Ms. Vera was not aware of any other environmental issues with properties along the I-20 corridor.

6.0 FINDINGS AND CONCLUSIONS

6.1 Findings

6.1.1 Regulatory Records Review

Upon review of federal and state environmental regulatory database records provided by EDR, it was determined that no NPL, proposed NPL, CERCLIS, CERCLIS-NFRAP, RCRA-CORRACTS, RCRA-TSDs, CERC-NFRAP, RCRA-LQG, ERNS, or SWLF sites should have impacted the subject project area. One RCRA-SQG site, one RCRA-CESQG site, one SHWS site, two UST sites, and eight LUST sites are located within one mile of the project area; however, based on their cleanup status, location, or hydraulic gradient relative to the project area, these sites should not have impacts to the project area.

6.1.2 Historical Data/Interviews

Based on the historical sources reviewed (aerial photograph, USGS quadrangle maps, interviews), dating back to 1962 (Historical Topographic Map), the project area consisted primarily of residences, commercial and light industrial properties, and undeveloped land along existing roadways. Potential areas of concern are not visible within the project area from the photographs and maps.

6.1.3 Site Reconnaissance

NSI personnel conducted on-site visual reconnaissance for various environmental liabilities/constraints within the project area on April 13, 2010. The project area is an approximate six-mile long corridor beginning at the I-20 Mississippi River Bridge and extending east to the Highway 61 North/I-20 interchange. The project area includes residential and commercial and light industrial properties, undeveloped land, and wooded areas.

Twenty-two potentially contaminated sites were observed through field reconnaissance and were not listed in regulatory databases. Common underground utilities such as natural gas lines, water and sewage lines, and other utility lines are located throughout the proposed project area. Generators containing gasoline and/or diesel were also observed at businesses along the I-20 corridor. Automotive repair shops and other sites that are located adjacent to the proposed project right-of-way and pose an environmental concern to the proposed project area should be re-evaluated for environmental contamination if the project area boundaries are redefined after finalization of this report. These sites are all located within Alternatives B and C.

6.2 Conclusions

In conclusion, NSI has performed this Survey of Hazardous Materials Sites of the proposed project area, an approximate six-mile long corridor extending west from the I-20/Highway 61 North interchange, terminating near the I-20 Mississippi River Bridge in Vicksburg, Warren County, Mississippi. The assessment has revealed the following sites located within and adjacent to the proposed project ROW that have a moderate to high risk with respect to environmental concern to the proposed project area and ROW:

EDR MLTS site

- *United States Army Corps of Engineers*

EDR UST sites

- *Pantry #3739 DBA Kangaroo*
- *Pantry #3444 DBA Fast Lane*

EDR UST and LUST sites

- *Pantry #3445 DBA Fast Lane*
- *Pantry #3750 DBA Kangaroo*
- *Pantry #3753 DBA Kangaroo*
- *Mac's Fina Station #536*
- *Pump & Save #2634 (also Sac & Save #49)*
- *Interstate Station #28*
- *Pantry #3443 DBA Fast Lane*
- *Battlefield Truck Plaza*
- *Pantry #3447 DBA Fast Lane*

EDR SHWS Site

- *Hall's Ferry Park and Dump*

EDR FINDS sites

- *Plaza Auto Service and Tire Center*

RCRA CESQG

- *Kroger/Former K-Mart*

RCRA SQG

- *Vicksburg Ford Lincoln Mercury*

EDR FINDS, FTTS, HIST FTTS, UST, and LUST site

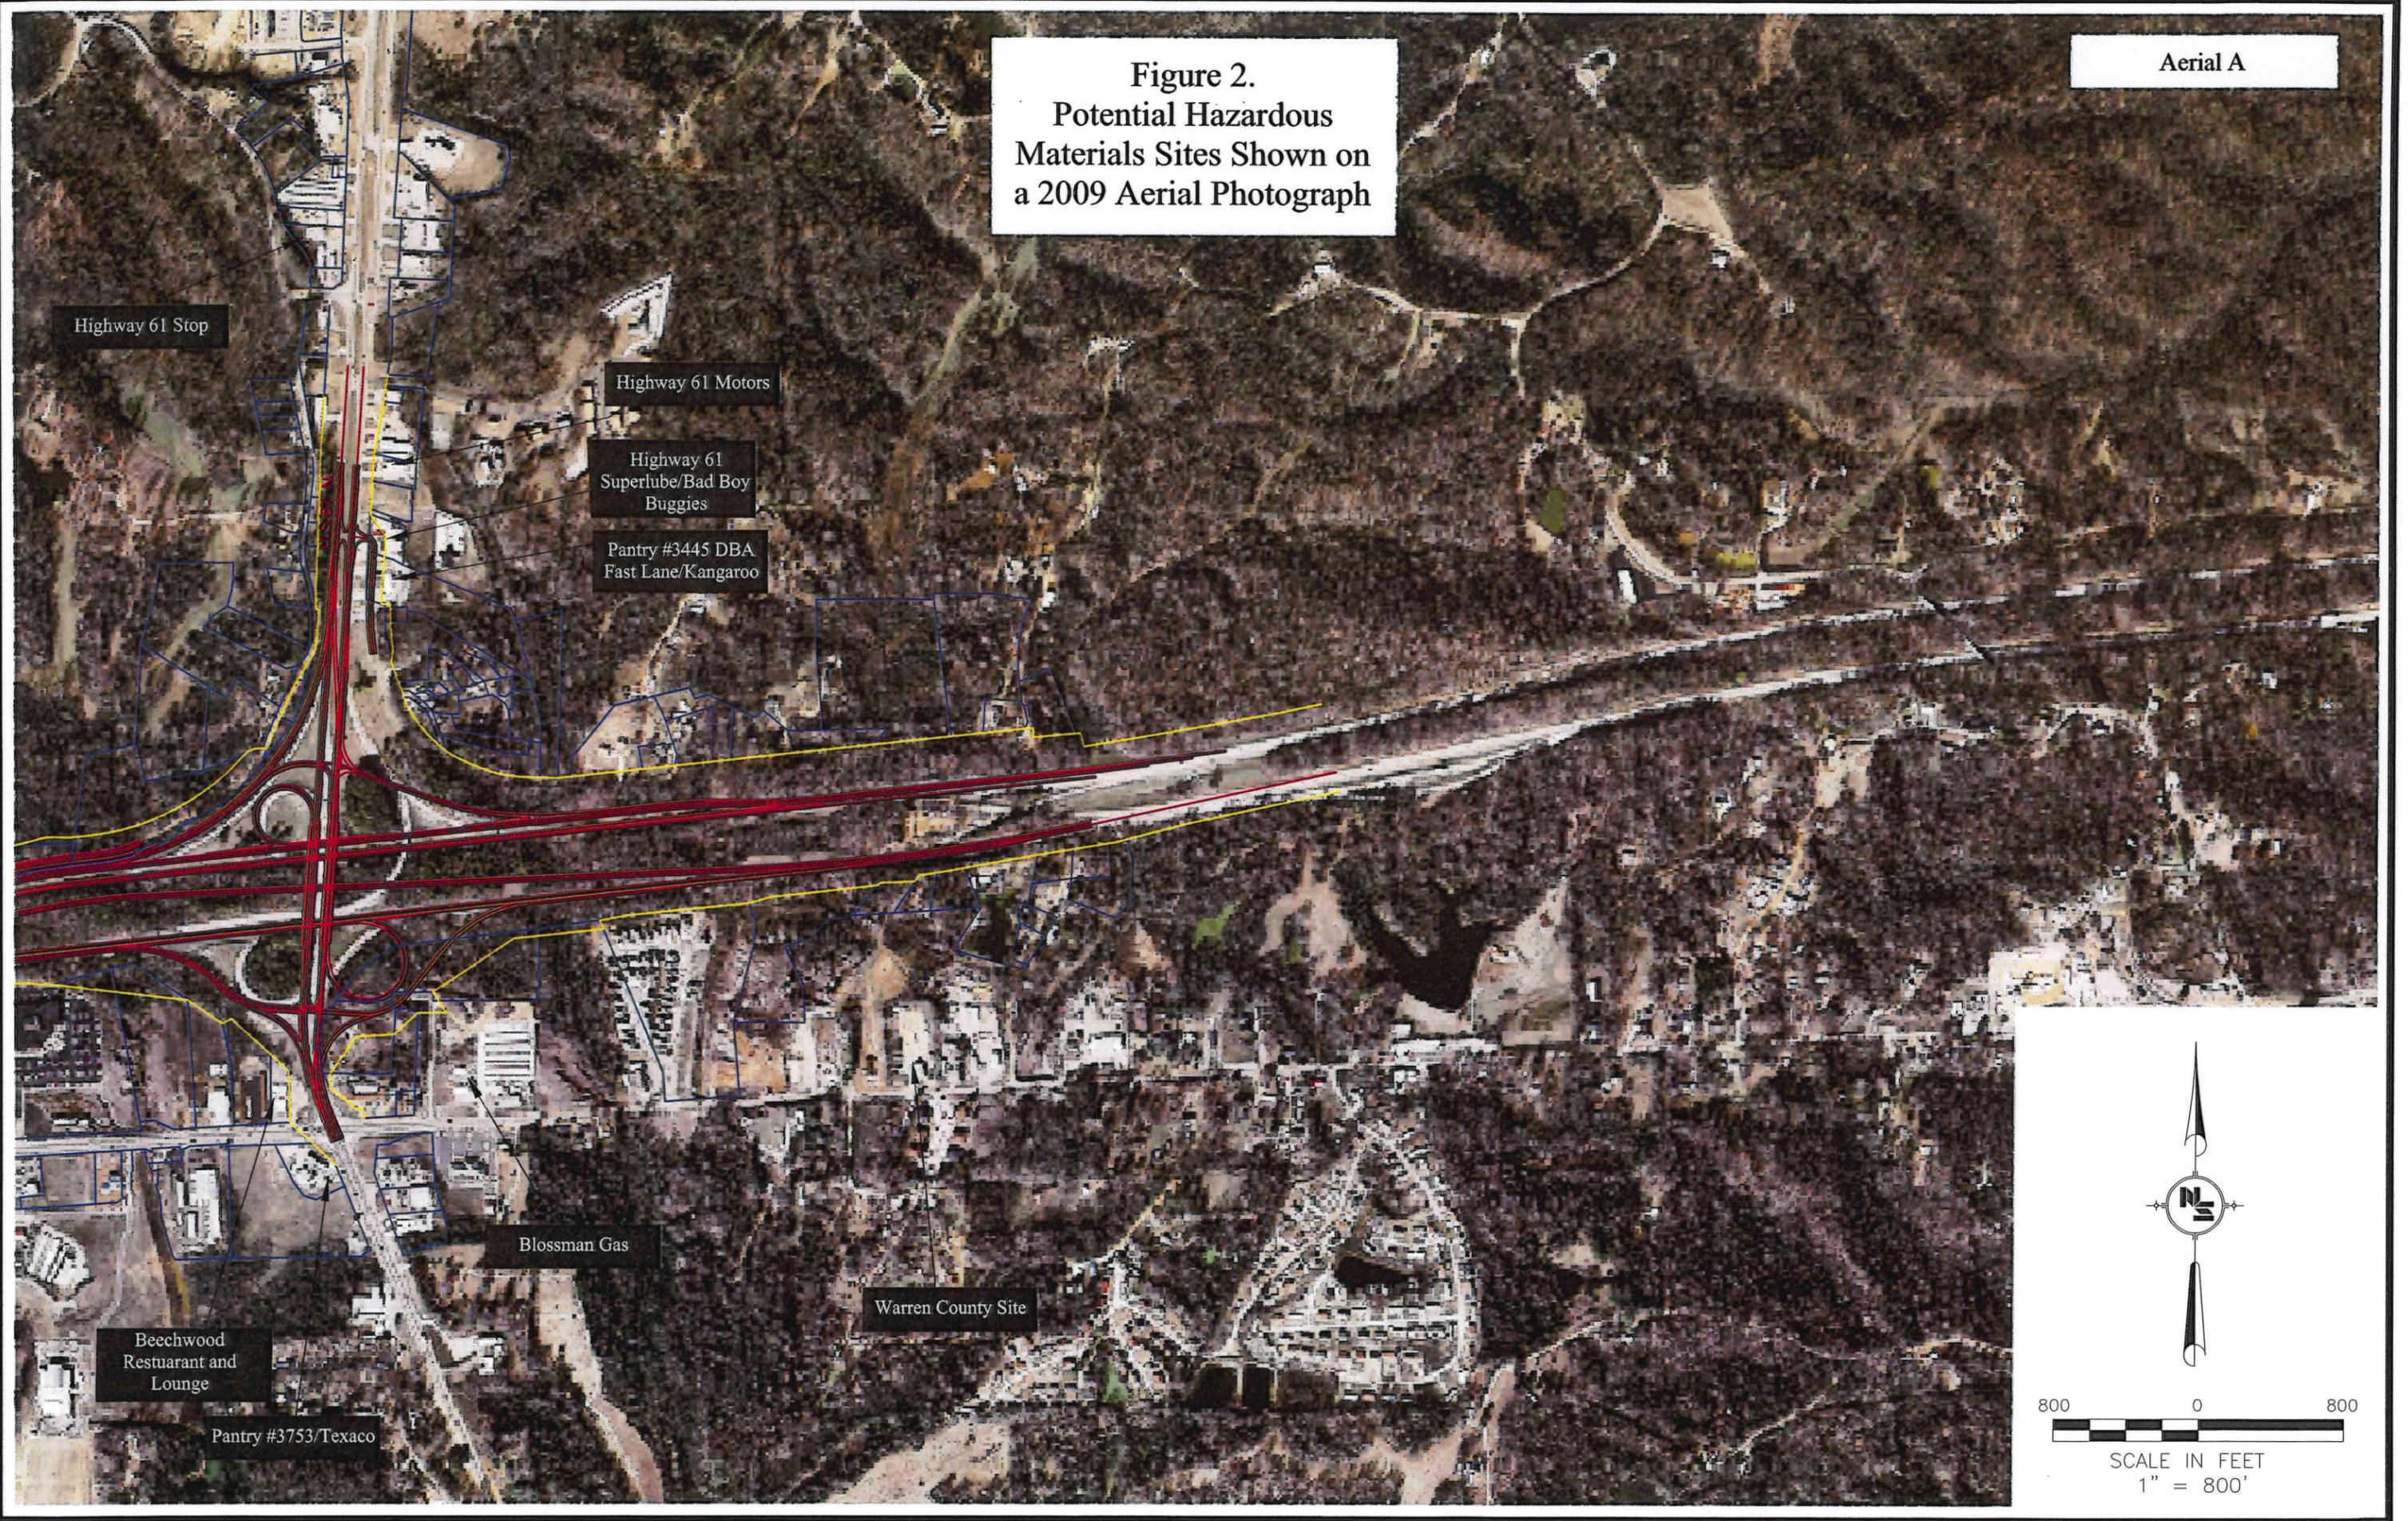

- *Vicksburg Medical Center/River Region West Campus*

Potential Hazardous Materials Sites found through Site Reconnaissance

- *Hillcrest Motel (former service station)*
- *Vacant lot (carnival equipment storage area)*
- *Highway 61 North Superlube and Extreme ATV's*
- *United Cleaners/Corner Market Shopping Center*
- *Kolb Grand Cleaners*
- *Vicksburg Cycles*

If the boundaries of the proposed project area are redefined after completion of this Survey of Hazardous Materials Sites, the sites reported by EDR and through our site reconnaissance windshield survey that are located adjacent to the proposed ROW should be re-evaluated for potential contamination. Further investigation, to include MDEQ file reviews, site reconnaissance, or soil and/or groundwater analytical testing, would be required to assess whether these properties have been impacted by current or historical activities and operations.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 08/20/2008 has revealed that there is 1 RCRA-LQG site within the searched area.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 08/20/2008 has revealed that there are 6 RCRA-CESQG sites within the searched area.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 08/20/2008 has revealed that there is 1 RCRA-NonGen site within the searched area.

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 07/12/2008 has revealed that there is 1 FTTS site within the searched area.

EXECUTIVE SUMMARY

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
VICKSBURG MEDICAL CENTER	1111 FRONTAGE RD. P.O.	21	85

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1 HIST FTTS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
VICKSBURG MEDICAL CENTER	1111 FRONTAGE RD. P.O.	21	85

MLTS: The Material Licensing Tracking System is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and are subject to NRC licensing requirements.

A review of the MLTS list, as provided by EDR, and dated 07/08/2008 has revealed that there is 1 MLTS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
ARMY, DEPARTMENT OF THE	4155 CLAY STREET	6	26

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/01/2008 has revealed that there are 21 FINDS sites within the searched area.

STATE AND LOCAL RECORDS

MS SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's Uncontrolled Site Project Tracking System.

A review of the MS SHWS list, as provided by EDR, and dated 07/01/2008 has revealed that there are 5 MS SHWS sites within the searched area.

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:

Other Pertinent Environmental Activity Identified at Site

MS-ENSITE (Mississippi - Tools For Environmental Management And Protection Organizations). Mississippi Department of Environmental Quality (MDEQ) Office of Pollution Control's (OPC) maintains enSite. It is the electronic Environmental Site Information System that that regulates compliance assurance, permitting, activity tracking, and maintenance of a single agency interest-link to definition master file

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 EPA Region: 04
 Classification: Conditionally Exempt Small Quantity Generator
 Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Owner/Operator Summary:

Owner/operator name: EMMETT ATWOOD
 Owner/operator address: 3531 FRONTAGE ROAD, I-20
 VICKSBURG, MS 39180
 Owner/operator country: Not reported
 Owner/operator telephone: (601) 638-1252
 Legal status: Private
 Owner/Operator Type: Owner
 Owner/Op start date: Not reported
 Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown
 Mixed waste (haz. and radioactive): Unknown
 Recycler of hazardous waste: No
 Transporter of hazardous waste: No
 Treater, storer or disposer of HW: No
 Underground injection activity: No
 On-site burner exemption: Unknown
 Furnace exemption: Unknown
 Used oil fuel burner: No
 Used oil processor: No
 User oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No
 Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

 Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
 Waste name: BENZENE

Waste code: D039
 Waste name: TETRACHLOROETHYLENE

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Biennial Reports:

Last Biennial Reporting Year: 2005

Annual Waste Handled:

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code: D000
 Waste name: Not Defined

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

 Facility name: WAL-MART SUPERCENTER #708
 Site name: WALMART SUPERCENTER #708
 Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D011
 Waste name: SILVER

Violation Status: No violations found

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 08/13/2008	Source: EPA
Date Data Arrived at EDR: 08/27/2008	Telephone: N/A
Date Made Active in Reports: 09/23/2008	Last EDR Contact: 07/28/2008
Number of Days to Update: 27	Next Scheduled EDR Contact: 10/27/2008
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/30/2008	Source: EPA
Date Data Arrived at EDR: 05/06/2008	Telephone: N/A
Date Made Active in Reports: 06/09/2008	Last EDR Contact: 08/27/2008
Number of Days to Update: 34	Next Scheduled EDR Contact: 10/27/2008
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/18/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/17/2008
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/09/2008	Source: EPA
Date Data Arrived at EDR: 07/22/2008	Telephone: 703-412-9810
Date Made Active in Reports: 08/25/2008	Last EDR Contact: 09/19/2008
Number of Days to Update: 34	Next Scheduled EDR Contact: 12/15/2008
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810
Date Made Active in Reports: 02/20/2008	Last EDR Contact: 09/15/2008
Number of Days to Update: 76	Next Scheduled EDR Contact: 12/15/2008
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 08/19/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/29/2008	Telephone: 202-564-6023
Date Made Active in Reports: 09/09/2008	Last EDR Contact: 08/18/2008
Number of Days to Update: 11	Next Scheduled EDR Contact: 11/17/2008
	Data Release Frequency: Varies

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/25/2008	Source: EPA
Date Data Arrived at EDR: 06/30/2008	Telephone: 800-424-9346
Date Made Active in Reports: 08/25/2008	Last EDR Contact: 09/02/2008
Number of Days to Update: 56	Next Scheduled EDR Contact: 12/01/2008

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 08/20/2008
Date Data Arrived at EDR: 08/21/2008

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 08/20/2008

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 08/20/2008
Date Data Arrived at EDR: 08/21/2008
Date Made Active in Reports: 09/09/2008

Data Release Frequency: Varies

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/23/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/29/2008	Telephone: 703-603-0695
Date Made Active in Reports: 08/25/2008	Last EDR Contact: 09/29/2008
Number of Days to Update: 27	Next Scheduled EDR Contact: 12/29/2008
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/23/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/29/2008	Telephone: 703-603-0695

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2007	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/23/2008	Telephone: 202-267-2180
Date Made Active in Reports: 03/17/2008	Last EDR Contact: 07/25/2008
Number of Days to Update: 54	Next Scheduled EDR Contact: 10/20/2008
	Data Release Frequency: Annually

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 04/30/2008	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 07/15/2008	Telephone: 202-366-4555
Date Made Active in Reports: 08/25/2008	Last EDR Contact: 07/15/2008
Number of Days to Update: 41	Next Scheduled EDR Contact: 10/13/2008
	Data Release Frequency: Annually

DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 05/14/2008	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 05/28/2008	Telephone: 202-366-4595
Date Made Active in Reports: 08/08/2008	Last EDR Contact: 08/29/2008
Number of Days to Update: 72	Next Scheduled EDR Contact: 11/24/2008
	Data Release Frequency: Varies

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 07/01/2008
Date Data Arrived at EDR: 08/25/2008

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

MS SHWS: CERCLA/Uncontrolled Sites File List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 07/23/2008

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Listing

Source: Department of Health
Telephone: 601-576-7613

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.
