# Executive Summary

Fiscal Year 2013

---

Mississippi's transportation system isn't just about highways anymore. With a commitment to rails, ports, public transit and air services, our state is truly multimodal. But in moving our citizens and our goods, we cannot overlook the monumental impact an enhanced highway system has made.

This enhanced highway system didn't just happen. In 1987, state lawmakers put into place a means to fund this effort and through a shared vision among legislative leaders and grass-roots advocates, the 1987 Four-Lane Highway Program (or A.H.E.A.D\* Program as it is sometimes called) was formed.

The legislation also allows MDOT the flexibility to maximize the use of federal funding by allowing the substitution of federal funds for state funds on gaming and maintenance projects.

The Mississippi Department of Transportation's goal at the inception of the 1987 Program was that every Mississippian would be linked to a four-lane highway within 30 miles or 30 minutes. MDOT continues to make great strides toward reaching that goal.

Mississippians have already realized the increase in economic activity and safety that four-lane highways bring. As of June 30, 2013, 1,077.1 miles of new four-lane highway are in use by the public.

This report summarizes the status of Vision 21 Construction Projects as of June 30, 2013. It also provides a record of funding and investments throughout the history of the Vision 21 program — documenting Mississippi's steady progress toward its vision.

\* A.H.E.A.D is an acronym for Advocating Highways for Economic Advancement and Development.

## Where are we today?

---

The original drafters of the 1987 Program intended that the work be completed in phases that overlapped each other with most of the work being conducted in Phase II. Detailed information about the projects that have been completed is on pages 12-13 and those that are left to be let to contract is available on page 7.

Phase IV of the program is now part of Vision 21, a needs-based highway program passed by the Mississippi Legislature during the 2002 session. An account of Vision 21 projects for 2013 can be found on page 26.

Today major industries and smaller businesses can be found popping up all around our state. At least part of the credit can go to the original A.H.E.A.D members who came together two decades ago with a dream for a statewide four-lane highway system that would benefit all of Mississippi. Credit should also be given to the legislative leaders and MDOT personnel who worked diligently to continue their "vision" through Vision 21.

MDOT remains committed to the 1987 Four-Lane Highway Program and Vision 21 Program. However, the funding structure put in place with the Four-Lane Program legislation has not been adjusted since its passage in 1987 and the state's transportation revenues are not keeping pace with needs of the state's transportation system. Quite simply, there is not enough transportation funding to address the state's maintenance needs, let alone address system capacity needs. As a result, MDOT has been forced to shift to a maintenance-only approach and focus first on system preservation. With the support of our legislators, the Transportation Commission and the MDOT staff are committed to finding a solution so that Mississippi continues to move AHEAD with a Vision for the future.
