Special Reports Prices

Description	Unit Price: Each
Mississippi Public Roads Selected Statistics	\$9.00

There are six types of statewide maps made available for purchase. See our map price list above for pricing information.

- Traffic Volume**
The average daily traffic volumes and count locations are shown on this map and are updated annually.
- Legal Truck Weight Limits**
This map shows the legal weight limits allowed on each state-maintained highway and legal weight limits on posted bridges. Maximum allowable axle loads and gross vehicle weight limits are also shown. Updates are made on a continuing basis.
- General Highway State Map**
The General Highway State Map shows among other things the county outlines, locations of cities and towns, the major public roads, the major streams and lakes, railroads, national forest boundaries, airports, state and national parks and the locations of the universities.
- The State Designated - State Maintained Map**
This map is updated annually to reflect the public roads that comprise the designated highway system as enacted by the State Legislature and also those routes that are maintained by the Mississippi Department of Transportation.
- County Outline State Map**
The County Outline map shows the county boundaries for each of the counties. Maps are available with a scale of 1" = 12 miles.
- Film Positives And Negatives**
Reproducible positives and negatives are available. These films may be purchased for the purpose of obtaining multiple copies of the available state maps.
- General Highway County Map**
The General Highway County Map shows all public roads except those shown on the City Maps. Other features shown are political boundaries, sections, township and range lines, streams and lakes, airports, and railroads. The General Highway County Map is available in scales of 1" = 1 mile, 1" = 2 miles and 1" = 3 miles. There are also some counties available with road names identified.
- General Highway County Map Atlas**
A bound atlas of the 82 General Highway County Maps is available for maps with a scale of 1" = 2 miles and 1" = 3 miles.

- **Film Positives And Negatives**

Film positives and negatives of the General Highway County Maps are available for reproduction.

- **Traffic Volume Maps**

An 8.5" x 11" book of maps of all 82 counties showing the latest average daily traffic is available. Traffic volumes are shown at strategic locations on most of the major public roads. These maps are updated annually.

- **Incorporated Areas**

City Maps are available for all incorporated areas. These maps show the public roads and streets within the corporate limits and within highly congested areas surrounding the cities. This map also shows sections, townships and range lines, streams and lakes, airports, and railroads, and may be obtained singly or within a map atlas.

- **Traffic Volume Maps**

Books of the Jackson or Gulf Coast urban areas showing the latest average daily traffic are available in 8½ x 11 sizes. An atlas of smaller cities and towns is also available.

State, County, City and Urban maps are available in computer digital graphic files. All county and city maps are not currently available in digital format.

Digital maps are available in three (3) Personal Computer (PC) file formats. The PC formats are:

- Standard MicroStation format. DGN is a binary file format that requires MicroStation PC software.
- Autocad Release 11/12 standard ASCII drawing exchange file format (DXF).
- Autocad drawing file (DWG). Requires Autocad Release 11/12, or later, PC software.

The Digital Maps are available on MS DOS floppy disks: 3 1/2" 1.44mb, and CD-ROM. The digital maps range from 1 megabyte to 5 megabytes in size.

Prices:

All PC floppy disk and CD-ROM based maps: \$20.00 each

NOTE: Digital maps are the same price for either State, County, City, or Urban maps.

Mississippi Public Roads Selected Statistics Extent, Travel And Designation

This annual report provides the public road length and annual vehicle distance traveled in rural and urban areas for each county. Additional information is summarized by functional classification and maintenance responsibility. Appendices include route locations and descriptions of: interstate, US and Mississippi highways, loops and spurs, and memorial highways and bridges. Maps of district locations, designated highway systems, and memorial highway systems are also included. Vehicle Classification count data and continuous traffic recorder data are also presented in this publication.
