# MISSISSIPPI STATE HIGHWAY DEPARTMENT

## Inter-Departmental Memorandum

TO: Chief Engineer  
James D. Quin

DATE: September 29, 1986

FROM: Asst. Chief Engineer  
Program & Planning  
Glenn Calloway *GC*

SUBJECT OR PROJECT NO: Temporary Easements

INFORMATION COPY TO:

COUNTY:

Based on the cost incurred for relocating utilities when they have been temporarily relocated to a temporary easement area outside of the permanent right of way and subsequently moved back to the right of way, it is recommended that on all future projects that permanent right of way be acquired. Then following the completion of the project, any surplus right of way would be sold back to the adjacent property owner. Temporary easements will only be used for such items as channel changes and incidental driveway or ramp connections.
