TO: Roadway Design Division Squads

DATE: May 18, 1995

FROM: Roadway Design Engineer
John Pickering

SUBJECT OR PROJECT NO: New Procedure for
Temp. Guard Rail
Delineators

INFORMATION COPY TO:

COUNTY:

Asst. Roadway Design Div. Engr.
Section Engineers
Quality Control Engineer
Active Consultants
Central Files
Files

The procedure being used on plans to indicate the quantity for delineators at temporary guard rail sites is to be changed. Presently, you are adding this quantity to Pay Item No. 630-F, Delineators (mounting), (description), and are footnoting the number of delineators to be used with temporary guard rail.

From now on, you are requested to use the pay item especially set up for temporary delineators--619-F3, Delineators (mounting), (description).

An updated CADD Pay Item List will be forthcoming within the next few days to assist you in this procedure change.

You do not have to change any plans that have already been printed for small blues.

If there are any questions, please advise.
