RECEIVED
OCT 07 1996
ROADWAY DESIGN

Effective January 1, 1997, all projects with concrete surfaces, (roadways and/or bridges), with ADT ≥ 2000 will receive the following types of permanent pavement markings.

Preformed High Performance Cold Plastic Pavement Marking tape will be required for all pavement markings on bridges and bridge end pavements. Concrete roadway pavements will be marked with preformed high performance cold plastic pavement marking tape on centerline and lane lines, while edge lines will be marked with water born traffic paint. The edge line policy for concrete roadways is subject to change as new tapes are developed and evaluated.

For those projects with ADT < 2000, water born traffic paint may be used for all pavement markings placed on concrete surfaces, (both roadway and bridges).
