MEMORANDUM

TO: Roadway Design Section Engineers

FROM: Keith Purvis *CKP*

RE: New Pay Item Numbers for Superpave Asphalt

On June 6, 1997, you were given a draft copy of the pay items for superpave asphalt. Since that time, we have been given a revised list of numbers and descriptions, which are attached.

Corrected bridge end pavement details for several projects are also attached. Please distribute them to the appropriate design squads and/or consultants.

Should additional information be deemed necessary, please advise.

907-403.05.1--Price Adjustment for Thickness Requirement. When grade stakes are eliminated as provided in 907-403.03.3 and the average thickness of all cores taken in a lot is more than 3/8 inch thicker than the total specified thickness of the pavement, excluding base lifts, a lump sum reduction in payment for the surface lift of the excessively thick lot(s) will be made as follows:

$$\text{Individual Lot L.S. Reduction} = \left(\text{Monetary Value of the lot's Surface Lift} \right) \times \frac{(D - 3/8)}{ST}$$

Where:

D = The lot's average deviation from total pavement thickness shown on the plans, excluding base lifts.

ST = Specified thickness of lot's surface lift.

The total L.S. reduction for the project is the summation of the individual lot reductions in payment.

907-403.05.2--Pay Items.

Payment will be made under:

907-403-AA: Hot Mix Asphalt, ST (____)	-per ton
907-403-BB: Hot Mix Asphalt, ST (____), Leveling	-per ton
907-403-CC: Hot Mix Asphalt, ST (____), Trench Widening	-per ton
907-403-DD: Hot Mix Asphalt, HT (____)	-per ton
907-403-EE: Hot Mix Asphalt, HT (____), Leveling	-per ton
907-403-FF: Hot Mix Asphalt, HT (____), Trench Widening	-per ton
907-403-GG: Hot Mix Asphalt, HT (____), Polymer Modified	-per ton
907-403-HH: Hot Mix Asphalt, HT (____), Polymer Modified, Leveling	-per ton
