MEMORANDUM

TO: John Pickering
Roadway Design Engineer

FROM: Thomas C. Russell
State Construction Engineer

SUBJECT: High Performance Cold Plastic Pavement Markings

There has been discussion concerning the measurement of high performance cold plastic traffic stripe used in short lengths on concrete surfaces, such as skip and edge lines on bridges. As you are aware, we round our quantities to the nearest whole number. Under current specifications, this means that a 300-foot bridge would have a quantity length of one mile for these items. In this case, to provide an estimated quantity that will allow more realistic bid prices, we are changing our specifications for high performance cold plastic traffic stripe to additionally allow for measurement of skip, continuous and edge lines by the linear foot or meter.

This is to request that this change be initiated immediately on all plans furnished to Construction Division.

The attached sheet will show the new units of measure for high performance cold plastic traffic stripe.

Thank you for your cooperation in this matter.

pc: Central File (Via Ass't. Chief Engineer - Operations)
Construction Division

- 907-628-I: 4" High Performance Cold Plastic Traffic Stripe (Skip White) - per mile or
linear foot
- 907-628-J: 4" High Performance Cold Plastic Traffic Stripe (Continuous White) - per mile or
linear foot
- 907-628-K: 4" High Performance Cold Plastic Edge Stripe (Continuous White) - per mile or
linear foot
- 907-628-L: 4" High Performance Cold Plastic Traffic Stripe (Skip Yellow) - per mile or
linear foot
- 907-628-M: 4" High Performance Cold Plastic Traffic Stripe (Continuous Yellow) - per mile or
linear foot
- 907-628-N: 4" High Performance Cold Plastic Edge Stripe (Continuous Yellow) - per mile or
linear foot
- 907-628-O: High Performance Cold Plastic Detail Stripe
(4" Equivalent Length) (Color) - per linear foot
- 907-628-P: High Performance Cold Plastic Legend (White) - per square foot or
linear foot
