Subject: New Asphalt Drainage Course

Wendel

We have been advised me to begin requiring the drainage course under HMA pavement to consist of:

907-306-3 4" Asphalt Drainage Course (by SY)

This is the same material that we have placed under concrete pavement in the past.

We plan to make this change on all future plans that have not been printed. However, unless advised otherwise by you, we do not intend on changing plans that have been printed.
