Subject: Invite Geotechnical Engineering Branch to Field and Office Reviews

The Geotechnical Engineering Branch needs to be invited to all Field and Office Reviews on projects containing issues relative to them. I have been informed problems have resulted during the construction

Wendel, recently, the Geotechnical Engineering Branch has not been afforded an opportunity to attend the above field and office reviews which has resulted in problems during the construction phase of the project. In the future please provide them with an invitation to attend the reviews on projects containing issues relative to them.

John B. Pickering

Roadway Design Division Engineer
