Subject: Slide Failures

Gentlemen:

This is to request a modification to any future slide repair plans in Dist. V. Repair plans that leave exposed rip-rap are unsightly and are a maintenance problem; therefore this is to request that any future plans for repairs of slides in Dist. V that incorporate the use of exposed rip-rap also include the use of topsoil material (and Type V geotextile fabric as applicable) to cover the stone. This will allow easier and more efficient maintenance of any ditches and of the vegetation both on and around the rip-rap.

Ken Wallace

Asst. District Engineer - Construction

District V - (601)683-3341
