Inter-Departmental Memorandum

Date: April 27, 2004

To: Roadway Design Section Engineers
Roadway Design Team Leaders

From: Roadway Design Division Engineer
John Pickering *J. B. P.*

Subject: Plan Development Procedures

- Separating Quantities
- BOP versus BOC

For plans that have not been completed, the following plan development procedures will be adhered to:

- If the Beginning of Construction (BOC) or End of Construction (EOC) extends more than approximately 300 feet beyond a county line, the quantities will be separated for an additional county. The project will also have two (2) counties with another project number added.
- If the BOC/EOC extends more than approximately 300 feet beyond the Beginning of Project (BOP) or End of Project (EOP), the BOP/EOP will actually be at the BOC/EOC point. This includes crossing a county line.

If there are any questions, please advise.
