Assistant Roadway Design Division Engineer (Purvis)  
Special Projects Engineer (Boteler)  
Roadway Design Section Engineers  
Construction Division (Lewis & Funchess)  
District Engineers  
Active Consultants  
FHWA  
Files

Starting with the January 2005 letting, pay items for Metal Overhead Sign Supports, Assembly No. \_\_\_, Contractor Designed and Overhead Sign Supported on Bridge, Assembly No. \_\_\_, Contractor Designed will need to include the 907 prefix in the pay item number.

This change is for "Contractor Designed" English projects only since metric signs already require the "907" prefix. Should we have some Non-Contractor Designed signs the "907" prefix will not be required.

The pay items affected are:

907-630-I, Metal Overhead Sign Supports, Assembly No. \_\_\_, Contractor Designed  
907-630-J, Overhead Sign Supported on Bridge, Assembly No. \_\_\_, Contractor  
Designed

Those projects which have been printed will be revised as requested by Construction Division.

If you have any questions, please advise.
