Subject: Survey Submittal Form -- RWD-200

A Federal Aviation Agency (FAA) permit may be required if an airport is within 4 miles of an MDOT project. Attached is a revised RWD-200, Survey Submittal Form, where we have added a check box under the Horizontal Data area which asks if there is an airport within 4 miles of this project. Failure to check the box on the RWD-200 when appropriate could delay the letting date since it takes quite some time for FAA approval. Please forward this revised form on to the appropriate employees in your District. Also, advise them to be certain they use the most recent RWD-200, Survey Submittal Form, which should be downloaded each time it is needed from <http://rwdweb/forms.htm>.

If there is an airport within 4 miles of the project, Roadway Design Division will review the preliminary information available at the time. If our review shows a permit is required, Ed Sansing of Roadway Design Division will contact your District Surveyor and provide the proper FAA Form that is required at the time. The District will be required to fill out the information on the FAA Form and send back to Roadway Design Division for submission to the FAA. Ed Sansing will be available for assistance in filling out the FAA Form

If you have any questions, let me know.

John B. Pickering
Roadway Design Division Engineer
