Subject: Mowing

Not sure if I have mentioned this to you before or not. The way our specification is written for re-fertilization, it requires the area to be mowed and we pay for the mowing under pay item 223-A. When the Project Engineers have to perform re-fertilization, they have to add Mowing by supplemental agreement. To eliminate this, we need to add Mowing to the original Summary of Quantities. Therefore, advise you Section Leaders to include pay item 223-A, Mowing whenever you have pay item 213-C, Superphosphate.
