Special Projects Engineer (Boteler)
Roadway Design Section Engineers
District Engineers
District LPA Coordinators
LPA Division (Smith)
FHWA
Consultants
RWD Files (Sutterfield)

Standard Drawing SN-8 has been revised. This drawing is no longer to be shown as a Standard Drawing on the Detail Index sheet in plans. This drawing has been renamed SDSN-8. The new drawing is to be shown on the Detail Index sheet as a Special Design Drawing and inserted in plans. The revision was required to revise our object marker standard to match what is shown in the standard highway sign book. Basically, all 4" stripes previously will now be 3.0" & 3.2" stripes.

Also, Special Design Drawing SDTCP-10 (or TCP-10) has been revised a second time. This drawing was recently changed from a Standard Drawing to a Special Design Drawing in a memo dated January 05, 2012. This additional revision was required to meet the changes being made to SN-8.

Do not make first order plan revisions solely for these changes. If other changes are being made, go ahead and make these changes at the same time.

The new drawings can be found at the Roadway Design web site under Special Design sheets.

Consultants:

Please distribute this Design Memo to any other of your offices that may have a need for it. All RWD Design Memos may be found on MDOT's FTP site: <http://ftp.mdot.state.ms.us>
