

MISSISSIPPI DEPARTMENT OF TRANSPORTATION

Inter-Departmental Memorandum

TO: Design Team Leaders

DATE: February 22, 2013

FROM: Russell Sutterfield 
Quality Control Engineer

SUBJECT OR PROJECT NO: Bituminous Curing Seal

INFORMATION COPY TO:

COUNTY:

Roadway Design Division Engineer (Reese)
Assistant Roadway Design Division Engineer (Pittman)
Special Projects Engineer (Geno)
Roadway Design Section Engineers
District Engineers
LPA Division (Altman)
FHWA
Active Consultants
— RWD Files (Sutterfield)

Effective immediately, a bituminous curing seal will be required on lime treated, lime fly ash treated and portland cement treated courses. Each curing seal has a unique pay item number. Please add these items to current plans if needed. Plans that have already been printed will require a revision.

For quantity calculation purposes, use 0.25 gallons per square yard.

Consultants: Please distribute this Design Memo to any other of your offices that may have a need for it. All RWD Design Memos may be found on GOMDOT under Divisions -> Roadway Design -> Design Memos.

If you have any questions, please advise.
