Subject: SDFI-1 & SDFI-1A

Design Team Leaders/Active Consultants,

The standard drawing for fence installation (FI-1) at bridges has been revised to include a gate. The gate was added at the request of district maintenance forces to allow better access. This drawing is no longer to be shown as a Standard Drawing on the Detail Index sheet in plans. This drawing has been renamed SDFI-1 and SDFI-1A. **Do not use SDFI-1A unless instructed by the Section Engineer.** The new drawing is to be shown on the Detail Index sheet as a Special Design Drawing and inserted in plans. Please check all plans in your area to insure that this change is incorporated. Since this does not cause a significant change in quantities, there is no reason to revise any projects that have already been printed.

The new drawings can be found at the Roadway Design web site under Special Design sheets.

Please advise all design team members of this design memo.

Consultants: Please distribute this Design Memo/Email to any other of your offices that may have a need for it. All RWD Design Memos may be found on GOMDOT under Divisions -> Roadway Design -> Design Memos.

If you have any questions, please advise.
